

ONSITE TRAINING

At Insight, we pride ourselves on our **FLEXIBILITY!**

When you book a training day with Insight Solutions, that's exactly what it is, your training day. We don't insist on nominated trainees, a maximum number of delegates or modular training. You can choose numerous topics you would like to cover throughout the day & the Insight Consultant who will carry out your training will contact you in advance to discuss your training requirements & help guide you to make the most of your training day and the most of your investment.

So if you would like us to provide a refresher to the GP's on making the most of consultation options, read code/summarising training for new staff, an update at your lunchtime clinical meeting on the most recent changes to QOF, refresher training on searches for your admin staff & help update your templates or data collection tools, it's no problem at all. And if on the day you change your mind or have thought of another topic, we'll accommodate that too!

All of our consultants are experts in primary care IT, so as well as providing first rate clinical systems training they also understand the needs of your practice & all the surrounding areas. If you tell us you need searches training that tells us it is likely your day will include clinical system training, QoF, read codes, data quality and much more - and that's exactly what we will deliver, quality training that will give you maximum return on your investment.

Following their training day, your staff will be enthused, confident & empowered on the topics included, better fulfilling their role within your business.
