

ENHANCED SERVICES

Guidance, implementation, recording & audit requirements for all existing enhanced services (NES, DES, ES)

Overview:

DES's are national schemes, usually set up & provided locally, linked to national priorities. Contractors are offered the opportunity to provide these services to their practice population.

Each year some enhanced services roll-over into the new financial year, however, there are always new services introduced.

In order to implement & manage these, Insight deliver a half-day seminar based on national enhanced services; content includes an overview of new enhanced services (to help you decide if they are applicable to your patient population), how to implement them within your practice, developing protocols/target patients, data entry templates & searches to help you manage them throughout the year.

More often than not practices struggle with enhanced services as the clinical system suppliers do not provide the same level of tools as they do for managing QoF. This seminar will ensure you understand the process for all enhanced services, from inception right through to claiming for ALL of the services you deliver to enhance patient care.

Who should attend?

The seminar is designed for locality/practice manager groups.
